Drainage and Wastewater Management Plans (DWMPs)

Investment Needs Workshop for the Stour River Basin Catchment

Agenda

- 1. Welcome and Purpose
- 2. Presentation: Investment Planning Process
- 3. Review of Investment Needs
- 4. Programme Appraisal
- 5. Delivering the DWMP Investment Needs
- 6. Next steps

Welcome and Purpose

Our Journey So Far ...

Working with others:

| Aug 2020 | Webinars: What is a DWMP? |
|--------------|--|
| Sept 2020 | Workshops: RBCS and Planning Objectives |
| Dec 2020 | Webinars: National BRAVA results |
| March 2021 | Webinars: Additional BRAVA Results |
| May 2021 | Workshops: Problem Characterisation & ODA |
| Aug-Oct 2021 | Workshops: Identifying Unconstrained Options |
| Sept 2021 | Initial public consultation |
| Dec 2021 | Webinars: Water Company funding |
| Jan 2022 | Webinar: FCERM Partnership Funding |
| March 2022 | Workshops: Investment Needs |

June 2022Public consultationMarch 2023Publish final DWMP

Purpose of Today's Workshop

Our aim today is to:

- Discuss and refine the investment needs identified in the draft DWMP
- Flag any missing investment needs
- Discuss prioritisation and timing for investment needs
- Review opportunities to co-create and co-deliver solutions
- Look at total investment needs across the river basin

Presentation: Investment Planning

Investment Strategies: Stour River Basin Catchment

- 21 wastewater catchments
- 392 WPS
- 5325km sewers
- 16% area
- 96% homes connected
- 591640 customers

Options Development and Appraisal

Stour River Basin :

Unconstrained Option Development meetings held on:

| Broomfield Bank | 24 September 2021 |
|-----------------------|-------------------|
| Canterbury | 02 September 2021 |
| Chartham | 03 September 2021 |
| Dambridge Wingham | 14 September 2021 |
| Margate & Broadstairs | 06 September 2021 |

May Street Herne Bay Swalecliffe Weatherlees Hill Westbere 26 August 2021 28 September 2021 10 August 2021 14 September 2021

Options Development Process Unconstrained Options

All options identify the BRAVA Planning Objective risk they address (this is an extract of the table)

Options Development Process Benefits Screening

Multi-criteria sustainability appraisal of potential benefits – enables screening and selection of 'best benefit' options

Carry forward constrained options

Appraises constrained options for the five areas identified by the national DWMP framework:

- 1) Feasibility and Risk (2 Questions)
- 2) Engineering and Cost (2 Questions)
- 3) Performance and Sustainability (3 Questions)
- 4) Operational (1 Question)
- 5) Environmental (9 questions, aligned to WRMP & SEA)

Scoring of options uses a +++/ --- approach and includes guidance on interpretation for each appraisal criteria

Options with more than two Minor Negatives (--) or one Major Negative (---) are screened out.

All other options pass to Feasible Option stage for costing

Options Development Process Feasible Options to Preferred Options

DWMP Data Tables

| SOLUTIO | ON RISKS | | | | | |
| The model has a Low risk DAP confidence score of 2 and was last verified in 2014. For the DAP vs DWMP assessment there have been 4 modelling elements deemed to be of a higher risk. The key risks between the DAP and DWMP models are Models Used,FEH Rainfall Used,GI File Used,Levels Applied mAD,. | | | | | | |
| data quality is recommended. | | | | | | |

SOLUTION BENEFITS

The solution addresses all the planning objectives mentioned in the strategic need

Each Wastewater System may have multiple feasible options.

Some Options may:

- address multiple BRAVA risks
- need to be combined to fully mitigate a BRAVA risk

"Preferred Options" are best value options

"Baskets of Measures" are created for the preferred option where more than one feasible option is required to reduce the risk for a planning objective to band 0

Outputs from Options Development Stage

- Table of Investment Needs for the Wastewater Catchment
- Each Investment Need assessed in terms of risk band reduction

| Location | Issues | Option | Indicative Cost | Indicative Timescale | Potential Partners |
|----------|--------|--------|--------------------|-------------------------|-----------------------|
| | | | | | |
| | | | | | |
| | | | | | |

Definitions:

- Location: Specific known location of the risk e.g. hotspot, high spilling CSO
- Issues: Description of the issue the option is tackling e.g. flooding
- Indicative Cost: Our initial estimate of the investment needed to deliver the option
- Indicative Timescale: Based upon when the risk occurs (now or in the future)
- Potential Partners: Opportunities to work with others

Investment Needs – Swalecliffe (SWAL) 1 of 3

| BIUUII | DRAFT |
|--------|-------|
|--------|-------|

| Option Ref | Location of Risk | Issues | Option | Indicative Cost | Indicative Timescale | Potential Partners |
|-------------|--|--|---|--------------------|-------------------------|----------------------------|
| SWAL.SC03.1 | High Street, West Cliff Whitstable, Marine Parade, Herne Bay Road, Lucerne Road | Internal Flooding and Pollution due to Blockages | Target customers with a campaign to reduce FOG (fats, oils & greases) and unflushables discharged into the sewer network. | £116k | Short to long term | Canterbury City Council |
| SWAL.OT01.5 | Catchment Wide | Foul / Combined Sewer Flooding | Hydraulic Model improvements: Surveys and reverification to improve model confidence and accuracy of simulations. | £100k | Short term | - |
| SWAL.PW01.2 | 7 Whitebridge Farm Seasalter WPS | Pollution due to WPS faults | Enhanced maintenance to improve WPS resilience and reduce pollution incidents | £1.46M | Short term | - |
| SWAL.PW01.2 | 8 Station Road Whitstable WPS | Pollution due to WPS faults | Enhanced maintenance to improve WPS resilience and reduce pollution incidents | £1.46M | Short term | - |
| SWAL.PW01.2 | 9 Brook Road Swalecliffe New WPS | Pollution due to WPS faults | Enhanced maintenance to improve WPS resilience and reduce pollution incidents | £698k | Short term | - |
| SWAL.PW01.3 | 0 Station Road Whitstable WPS | Pollution due to WPS faults | Enhanced maintenance to improve WPS resilience and reduce pollution incidents | £698k | Short term | - |
| SWAL.PW01.3 | Thanet Way Chestfield Whitstable & Radfall Corner Chestfield Whitstable | Pollution due to Blockages | Target customers with a campaign to reduce FOG (fats, oils & greases) and unflushables discharged into the sewer network. | £23k | Short to long term | Canterbury City Council |
| SWAL.PW02.1 | Swalecliffe WTW Short Sea Outfall | Pollution due to WTW faults | Restore WTW Storm Sewage Discharge Capacity: Link to Southern Water's AMP7 funded Scheme (PRN 780401) to replace the structurally damaged short sea outfall and restore capacity to discharge storm flows to sea | £0 | Short term | - |
| SWAL.PW01.3 | Lucerne Drive WPS, Lucerne Road Seasalter WPS, Kingsdown Lane, 2 Clifton Road, Harbour Street, Castle Road, Swansfield Road, Richmond Road | Sewer Collapse | Targeted CCTV or electroscan surveys and proactive sewer rehabilitation to reduce risk of sewer collapse | £3.22M | Short to medium term | - |
| SWAL.PW01.1 | Herne Bay Rd, Burnan Rd, Chestfield Rd and Ham Shades Lane | Foul / Combined Sewer Flooding | Drainage Area Plan (DAP): Option - Sewer Upsize and Online Storage | £TBC | Short term | - |
| SWAL.PW01.2 | Seasalter Lane and Lurcene Drive | Foul / Combined Sewer Flooding | Drainage Area Plan (DAP): Option - Sewer Upsize and Offline Storage | £TBC | Short term | - |

Investment Needs – Swalecliffe (SWAL) 2 of 3

| Option Ref | Location of Risk | Issues | Option | Indicative Cost | Indicative Timescale | Potential Partners |
|--------------|--|-----------------------------------|--|--------------------|-------------------------|--|
| SWAL.PW01.3 | Joy Lane, Essex Street and Belmont Road | Foul / Combined Sewer Flooding | Drainage Area Plan (DAP): Option - Sewer Upsize and Online Storage | £TBC | Short term | - |
| SWAL.PW01.13 | Ham Shades Lane | Foul / Combined Sewer Flooding | Flood Storage (990m3): Attenuate excess flows in sewer network using storage tanks to reduce risk of flooding. Option priced based on storage tanks but surface water separation is the preferred approach and will be developed as part of the solution with our partners. | £1.18M | Short term | Kent CC, Catchment Partnership, Kent Wildlife Trust |
| SWAL.PW01.14 | Borstal Hill | Foul / Combined Sewer Flooding | Flood Storage (1760m3): Attenuate excess flows in sewer network using storage tanks to reduce risk of flooding. Option priced based on storage tanks but surface water separation is the preferred approach and will be developed as part of the solution with our partners. | £1.72M | Short term | Kent CC, Catchment Partnership, Kent Wildlife Trust |
| SWAL.PW01.15 | Seasalter Lane | Foul / Combined Sewer Flooding | Flood Storage (4890m3): Attenuate excess flows in sewer network using storage tanks to reduce risk of flooding. Option priced based on storage tanks but surface water separation is the preferred approach and will be developed as part of the solution with our partners. | £3.93M | Short term | Kent CC, Catchment Partnership, Kent Wildlife Trust |
| SWAL.PW01.16 | Lurcene Drive | Foul / Combined Sewer Flooding | Flood Storage (970m3): Attenuate excess flows in sewer network using storage tanks to reduce risk of flooding. Option priced based on storage tanks but surface water separation is the preferred approach and will be developed as part of the solution with our partners. | £1.16M | Short term | Kent CC, Catchment Partnership, Kent Wildlife Trust |
| SWAL.PW01.17 | Millstrood Road | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Construct new sewers and upsize sections of existing ones | £1.46M | Short to medium term | - |
| SWAL.PW01.18 | Maydowns Road | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.19 | Area upstream of Whitebridge Farm WPS | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.20 | Golden Hill | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.21 | Area upstram of Golden Hill WPS | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.22 | Grasmere Road | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.23 | Clapham Hill | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |

Investment Needs – Swalecliffe (SWAL) 3 of 3

| Option Ref | Location of Risk | lssues | Option | Indicative Cost | Indicative Timescale | Potential Partners |
|--------------|---------------------------------------|--------------------------------------|---|--------------------|-------------------------|--|
| SWAL.PW01.24 | Thanet Way | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Construct new storage manhole, 107m of new 1800mm dia sewer and upsize sections of local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.25 | Diamond Road | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.PW01.26 | Church Lane | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Upsize sections of existing local sewers | £1.46M | Short to medium term | - |
| SWAL.OT01.2 | Northwood Road Whitstable No.1 CSO | Foul / Combined Sewer Flooding | Growth Drainage Area Plan (DAP): Surveys and model reverification to develop storage solution at CSO | £100k | Short term | - |
| SWAL.OT01.5 | Catchment Wide | Foul / Combined Sewer Flooding | Hydraulic Model improvements: Surveys and reverification to improve model confidence and accuracy of simulations. | £100k | Short term | - |
| SWAL.PW01.6 | Diamond Road Whitstable CEO | CSO Spills | Construct 1522m3 storage tank to reduce spill frequency to Bathing and Shellfish Waters | £1.55M | Short to medium term | Environment Agency |
| SWAL.OT01.3 | Tankerton Circus CSO | CSO Spills | Improve model and develop solution to construct storage tank to reduce spill frequency to Bathing and Shellfish Waters | ~£1.0M | Short to medium term | Environment Agency |
| SWAL.OT01.4 | Swalecliffe WTW | CSO Spills | Improve model and develop solution to construct storage tank to reduce spill frequency to Bathing and Shellfish Waters | ~£1.0M | Short to medium term | Environment Agency |
| SWAL.PW02.2 | Swalecliffe WTW | WTW Dry Weather Flow Compliance | Review DWF permit for the WTW with the EA, and increase capacity of Primary and Secondary Settlement Tanks | £1.98M | Short term | Environment Agency |
| SWAL.OT01.6 | Catchment wide | Ecological Status of Waterbodies | Study & Investigations to understand the impact of wastewater discharges and identify measures required to achieve good ecological status in the Sarre Penn and River Wantsum | £697k | Short term | Environment Agency |
| SWAL.OT01.1 | Catchment wide | Nutrient Balance in Habitat Sites | Study & Investigations to understand the impact of wastewater discharges and identify measures required to secure Nutrient Neutrality in The Swale, Medway Estuary & Marshes | £76k | Short term | Environment Agency, Natural England |
| SWAL.OT01.7 | Catchment wide | Bathing Waters Quality | Link to ongoing Bathing Waters studies within business and use recommended measures to develop solutions in next DWMP cycle | £0 | Short term | Environment Agency |
| SWAL.OT01.8 | Catchment wide | Shellfish Waters Quality | Link to ongoing Shellfish Waters studies within business and use recommended measures to develop solutions in next DWMP cycle | £0 | Short term | Environment Agency |

Other Issues from the DWMP Feedback / Input Log

- Pathfinder Programme is already underway investigating sustainable solutions to the overflows in Deal, Swalecliffe, Margate and Herne Bay
- Investigation of whether the discharges to ditches in the marshes need an EA permit
- Misconnections of foul sewers into surface water network
- Short term flood mitigation devices for properties at risk of flooding
- Facilitating new connections to prevent groundwater pollution
- Mapping surface water networks to identify responsibilities
- Repair / refurbish Gorrell Storage Tank

Questions

Review of Investment Needs

Risks in the Stour Catchment

BRAVA Results indicated the main risks in this river basin catchment are for the following Planning Objectives (PO):

- Good Ecological Status / Potential (PO9)
- Nutrients (PO11)
- Flooding (PO7)
- Pollution (PO2)

PO9 – Good Ecological Status

Programme Appraisal

Programme Appraisal

- Purpose: to develop an optimised 'best value' plan of measures to achieve the planning objectives
- Process: Collated all the investment needs from the 61 wastewater catchments, with information on costs and risk band reductions (across all 14 planning objectives)
- Extrapolated investment needs to other wastewater catchments in the river basin based on average cost per band reduction for each planning objective
- Optimise and prioritise investment needs for the final DWMP consultation

Stour : DWMP Cost & Risk Band Reduction

Questions

Delivering the DWMP Investment Needs

Funding the DWMP Investment Needs in PR24

in base for Price Review 2019)

regulations, climate change etc

Examples of Enhancement Spend

- New environmental requirements
- New or emerging water quality risks or tightening of regulations
- Other new statutory or regulatory requirements
- Customer supported improvements special cost cases
- Level of service improvement beyond upper quartile performance special cost cases supported by customers

How to Fund Enhancements?

- A clear need
- Clear efficient cost of delivery
- Customer support Including a clear willingness to pay extra for it
- Clear cost benefit + proven environmental & social value
- Customer protection from non-delivery or significant underspend

Catchment and nature-based solutions

Key findings from our DWMP:

- Significant percentage of rainfall in sewers
- Need to tackle sewer flooding and storm overflows at source – surface water separation / attenuation
- Potentially huge benefits to people & the environment

Pathfinder projects in AMP7 – pioneering solutions in AMP7 to support our business cases for next Business Plan (PR24)

Catchment portfolios have been developed in our Water Resources Management Plan (WRMP), which include solutions such as:

- River restoration
- Nutrient and sediment reduction
- Working with farmers to improve land management practices
- Sustainable drainage systems (SuDS)

Next Steps

Our DWMP Delivery Programme

Questions

Summary

Summary of Workshop

Our aim today was to:

- Discuss and refine the investment needs identified in the draft DWMP
- Flag any missing investment needs
- Discuss prioritisation and timing for investment needs
- Review opportunities to co-create and co-deliver solutions
- Look at total investment needs across the river basin

Poll

| CANT.PW 01.1 | The Stade Folkstone WPS | Internal flooding | Enhanced WPS maintenance programme to elimate the risk of pollution incidents due to operational failures | £232 k | Short to Medium term | — |
| CANT.PW 01.2 | South Canterbury Road, Tyler Hill Road, and School Lane | Internal flooding | Provide offline storage (volume TBC by modelling) or separate rainfall runoff at source to reduce internal flooding events | £1 M | Short to Medium term | Stour CC |
| CANT.PW 01.3 | Tile Kiln Hill Blean WPS and North Honey Hill WPS | Pollution | Enhanced WPS maintenance programme to elimate the risk of pollution incidents due to operational failures | £466 k | Short to Medium term | — |
| CANT.PW 01.4 | Catchment wide | Sewer Collapses Rising Main Bursts | Pipe rehabilitation programme: CCTV surveys, sewer integrity checks, re-lining and renewal of rising mains | £8 M | Short to Medium term | — |
| CANT.PW 01.7 | East Kent Chalk - Stour | Leaking utility sewers | Pipe rehabilitation programme: CCTV surveys, sewer integrity checks, re-lining and renewal of assets | TBC | Short to Long term | Stour CC Natural Engla |
| CANT.PW 01.8 | Catchment wide | Pollution Groundwater pollution | Pipe rehabilitation programme: CCTV surveys, sewer integrity checks, re-lining and renewal of assets | £6 M | Short to Long term | — |
| CANT.PW 01.9 | Ethelbert Road, Downs Road, North Lane, Castle Street, St. Peters Street, Reed Avenue, Palace Street, Cockering Road, Cherry Garden Road, Tyler Hill Road, Mill Road, Orchard Street, Northgate, Dover Street, St. Georges Street, Knight Avenue | Internal flooding Pollution | Enhanced maintenance: proactive jetting | £526 k | Short term | _ |
| CANT.PW 01.10 | LONGPORT ROAD | Growth & Flooding | Growth Drainage Area Plan (DAP) Option: Construct a new manhole; Upsize existing sewers; Construct a throttle pipe | TBC | Medium to Long term | — |
| CANT.PW 01.11 | CHAUCER CLOSE TO CANTERBURY WTW | Growth & Flooding | Growth DAP Option: Construct new pumping station; provide new rising main; Re-assign new development to the new wet well; New ring sewers | TBC | Medium to Long term | _ |
| CANT.PW | Shalloak Road | Growth & Flooding | Growth DAP Option: Construct new pumping station; Provide new rising main: Re-assign new development to the new wet well | TBC | Medium to | _ |

Investment Needs – Canterbury (CANT) 2 of 2

| Option Ref | Location of Risk | Issues | Option Description | Indicativ | Indicative Timescale | Potential partners |
|------------------|---|-----------------------------------|--|-----------|-------------------------|--------------------------------------|
| CANT.PW 01.13 | Kingsmead Road | Growth & Flooding | Growth DAP Option: additional stotage at Kingsmead Road Canterbury CSO | TBC | Medium to Long term | |
| CANT.PW 02.2 | CANTERBURY WTW | Dry Weather Flow | Increase capacity at the Works and review Dry Weather Flow permit to reduce risk to DWF compliance | £2 M | Medium to Long term | EA |
| CANT.OT0 1.2 | Catchment Wide | Dry Weather Flow | Study/investigation required to indentify areas of high infiltration | £175 k | Short term | EA |
| CANT.OT0 1.4 | Great Stour between A2 and West Stourmouth | GE Status / Potential | Study and Investigation: Phosphate | £175 k | Short term | Natural England |
| CANT.OT0 1.5 | Stodmarsh | Nutrients | Study/investigation required to understand the impact of wastewater discharges and achieve or prevent deterioration from Natural England's revised Common Standards Monitoring Guidance (rCSMG) targets Total Phosphorus and Total Nitrogen | £76 k | Short to Medium term | EA Stour CC Natural England |
| CANT.OT0 1.6 | Catchment Wide / Overflow Locations | Flooding & Drainage | Study Model improvements: 3 month flow survey to catch both storm and dry data and calibrate these against the model should be conducted | £175 k | Short term | Stour CC |
| CANT.OT0 1.7 | CANT FC05 Tyler Hill | Foul / Combined Sewer Flooding | Provide offline storage of approximately 51m3 or separate rainfall runoff at source to reduce spills from the EMO at Tyler Hill; storage volume needs to be confirmed due to discrepancies between DAP and model data | £175 k | Short term | _ |
| CANT.OT0 1.8 | CANT FC6 Canterbury WTW | Foul / Combined Sewer Flooding | Provide offline storage of approximately 331m3 or separate rainfall runoff at source to reduce spills from the SSO at Canterbury WTW; storage volume needs to be confirmed due to discrepancies between DAP and model data | £175 k | Short term | _ |
